1 Introduction

This usage guideline describes how the MUPS file format can be used to initiate Hungarian multiple domestic credit transfers and multiple direct debits.

The file format can be uploaded in the channels:

- InsideBusiness Payments

1.1 General info about the MUPS format

- A MUPS file contains either credit transfers or direct debits.
- A MUPS file contains a header block followed by one or more item blocks and closes with a footer block.
- It's a fixed format, so every data item starts at a predefined position in the file.
- Use spaces for empty data in alphanumeric fields.
- Use zeroes for empty data in numeric fields.
- Alphanumeric fields right aligned with preceding spaces.
- The following characters are supported:
 - a b c d e f g h i j k l m n o p q r s t u v w x y z
 - A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
 - 0 1 2 3 4 5 6 7 8 9
 - / - ? : () . , ' +
 - Space
- InsideBusiness Payments automatically replaces non-supported characters in payment files that are imported via file import.
- The file must be encoded in UTF-8 format.
- Payments imported using the MUPS format always become multiple payments (booking type Total amount on account statement).
